

SWEET CYLINDER

MATERIALS:

Construction paper (half sheet and full sheet)
OR copy paper

Crayons

Pencil

Glue stick (optional)

INSTRUCTIONS:

1. If you have construction paper, glue the small piece of construction paper in the center of the large piece. Or you can do this lesson on copy paper.

2. Using a pencil, draw a large cylinder on the center piece of construction paper. Add some decoration to the cylinder. Add a horizon line to create a tabletop.

3. Outline the image with black or dark crayon.

4. Color in cylinder, tabletop and background with crayons.

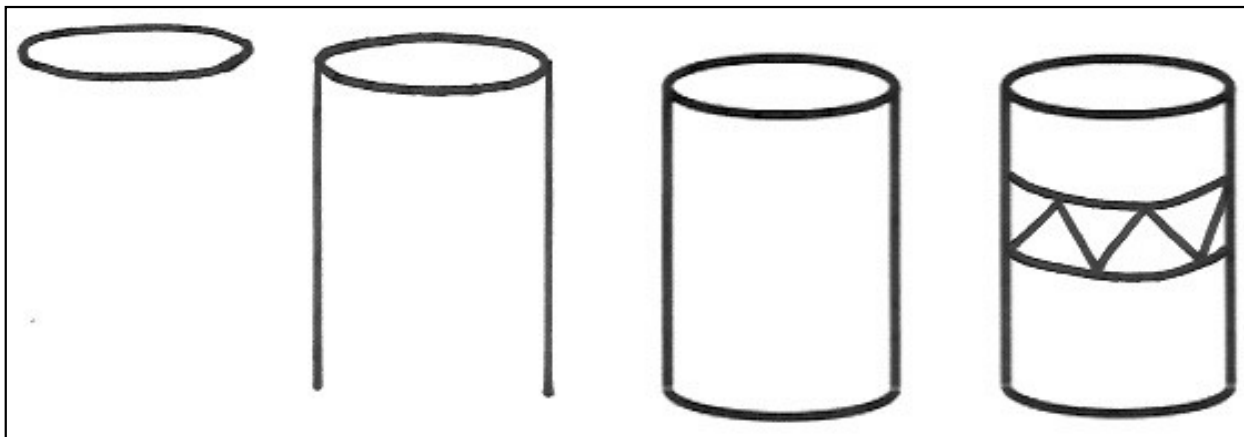

5. Add a design of a repeated pattern in the space around the center image.

Vocabulary: cylinder, horizon line, pattern, vertical

HAVE FUN!!!

HOW TO DRAW A CYLINDER

1. Draw a flat oval at the top.

2. Draw straight lines down from the outside edge of the oval.

3. Draw a curved line at the bottom to connect the straight lines.

4. Lines to decorate need to be curved like the bottom curved line.

When drawing a rounded cylinder with vertical lines, the center line is straight and then the other lines curve as they go to the outside.
