

Mosyle - Using Mosyle Manager Self-Service

Within the Mosyle Manager app, students will have access to a self-service page for apps and books, as well as Study Sites listed by each of their teachers. In this area, apps and books are displayed for students to select and install or update at their convenience. It's designed to function as an app and book catalog, where the school and the student's teachers can make apps and books available for installation - if the user chooses to install them.

To see the applications your school has made available, click **"My Apps"** in the top menu bar.

Students will be able to view apps the school has made available and apps listed in each of their teacher's list of Study Apps by clicking the **"Apps"** icon in the bottom menu of their Mosyle Manager app.

Students will be able to view the websites included in each of their teacher's list of Study Sites by clicking the **"Websites"** icon in the bottom menu of their Mosyle Manager app.
