

How to Access StudySync with Lost Student PIN

If Students cannot remember their PIN code after their initial sign in. They only have to re-enter a new app key and create a new PIN code.

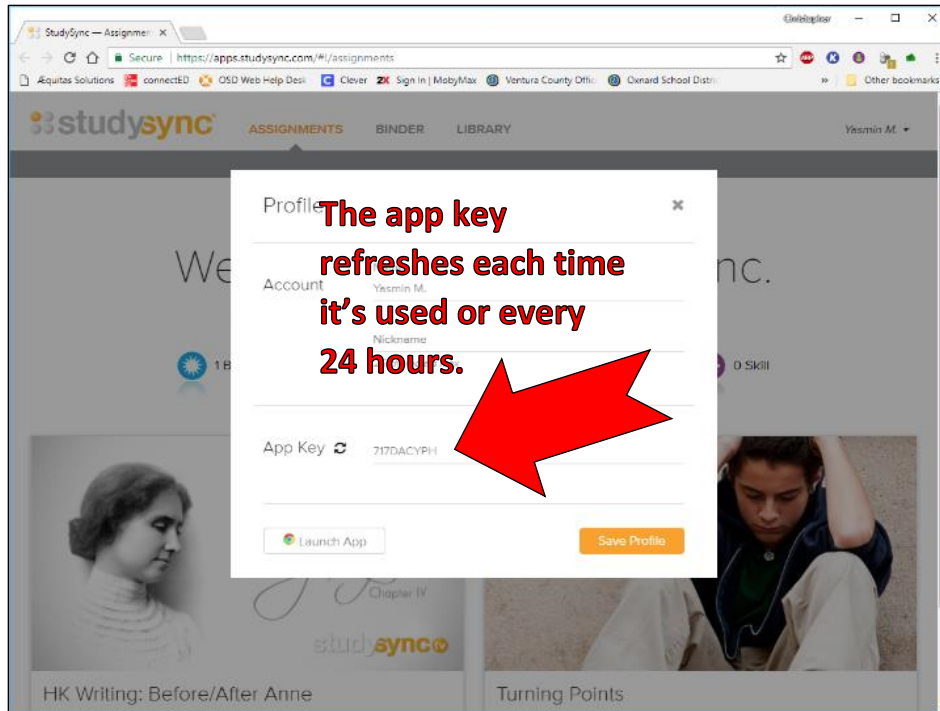

Students will see their name but without a PIN code they will need to enter a new app key again to access their content. No data will be lost.

Have students sign into their StudySync account via web browser and select their profile. Have easy to find links to the ConnectED website by adding links to the iPad home screen or in a program like Google Classroom or Edmodo.

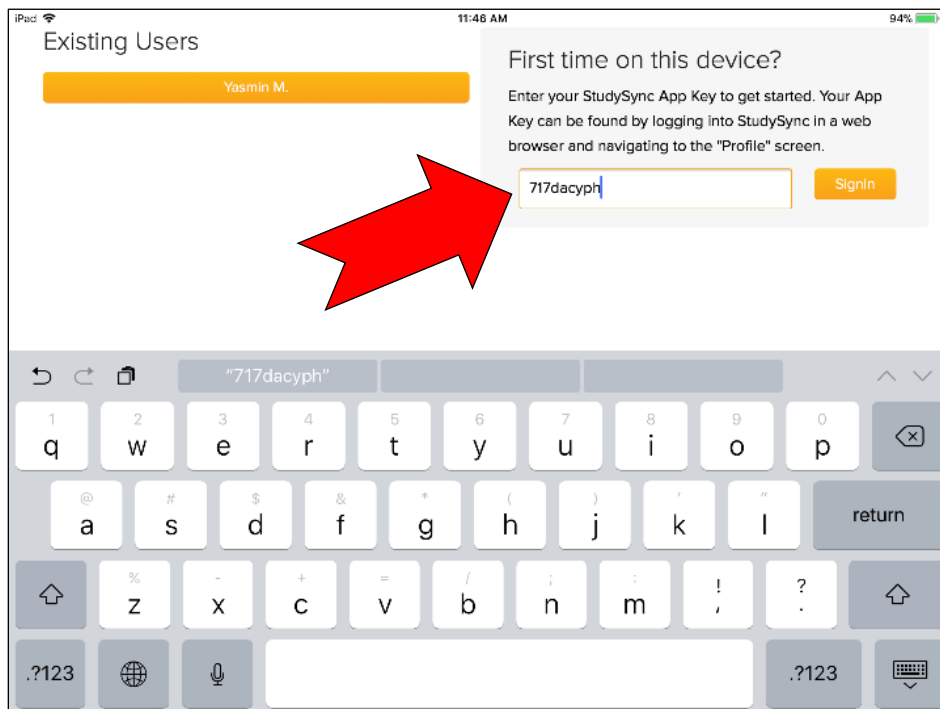

Students will find their app key in their profile. Once a key has been used once it cannot be reused. So, each time a student needs to re-enter an app key it will be different. App keys only last 24 hours before expiring.

The app key refreshes each time it's used or every 24 hours.

Enter app key and select sign in as if logging in for the first time. Students will then be prompted to create a new PIN. It is advisable for them to record their PIN for easy future reference.
