

Data Dashboard

Note: In Wonders 2020, assessments that require teachers to manually grade items will not appear in the Data Dashboard until they have been fully graded. This is a change from the 2017 version of Wonders, where this was not a requirement.

Overview

On the **Data Dashboard**, you can view student data in interactive tables.

1. On the Navigation Banner, click **Assessment & Data**.
2. Select **Data Dashboard**.

Data Collection

Data in the available reports is collected from three sources

- Online Assessments
- Online Games
- Observational Rubrics

Each of these items is aligned to specific Wonders skills and ELA standards. Data is averaged to produce student performance scores.

Navigate

You can easily filter and drill-down on the pages to access the types of information you want to view. Specify the information you want to see by selecting from the available filters and lists.

1. **Select Report** — select the report to view the information you want; available reports include the Recommendations Report, the Activity Report, and the Skills Report.
2. **Select Date** — specify the dates of the information you want to view; you can see the last week, the last month, or determine a specific date range.
3. **Export to PDF** — create a printable PDF version of the current report.
4. **Class/Student** — specify if you want to view the scores of the whole class or a particular student.
5. **Skills/Standards** — specify the data from particular skills or standards.
6. **Activity Types** — specify the type of activity recorded or all of them.
7. **Report-Specific Information** — drill-down the information further by selecting from the topics available on the left side of the report. Each report has its own list of topics.

The screenshot shows the 'Data Dashboard' interface for a 'Recommendations Report'. The interface includes several key elements highlighted with red numbered callouts:

- 1**: The 'Recommendations Report' dropdown menu.
- 2**: The date range selector showing '01/22/2018 - 04/30/2018'.
- 3**: The 'Export to PDF' icon.
- 4**: The 'Class/Student' filter dropdown set to 'ALL STUDENTS'.
- 5**: The 'Skills/Standards' filter dropdown set to 'WONDERS SKILLS : UNIT 3/WEEK 2'.
- 6**: The 'Activity Types' filter dropdown set to 'ALL'.
- 7**: The 'Report-Specific Information' section on the left, showing 'Comprehension Skill - Point of View' with a 'Class Average: 90%' and 'Vocabulary - Context Clues: Definitions and Restatements' with 'Class Average: No Data'.

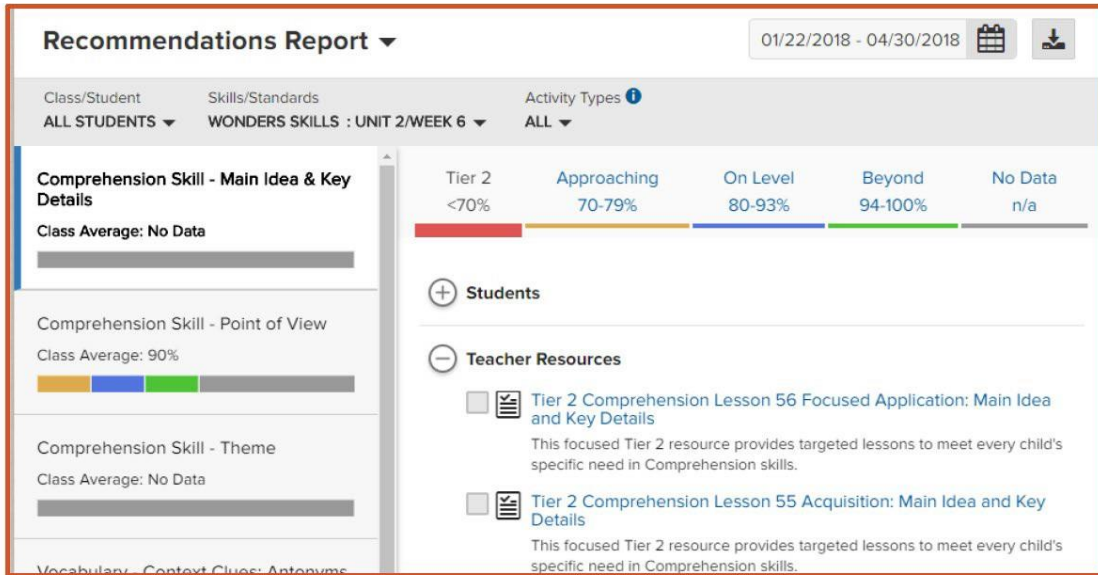

The main content area displays a performance bar for 'Tier 2' with categories: <70%, 70-79%, On Level (80-93%), Beyond (94-100%), and No Data (n/a). Below this, there are sections for 'Students' and 'Teacher Resources', with the latter listing resources like 'Fluency' and 'Tier 2 Comprehension Lesson 37 Acquisition: Point of View'.

Types of Reports

Select the report type in the drop-down list in the upper-left corner of the **Data Dashboard**.

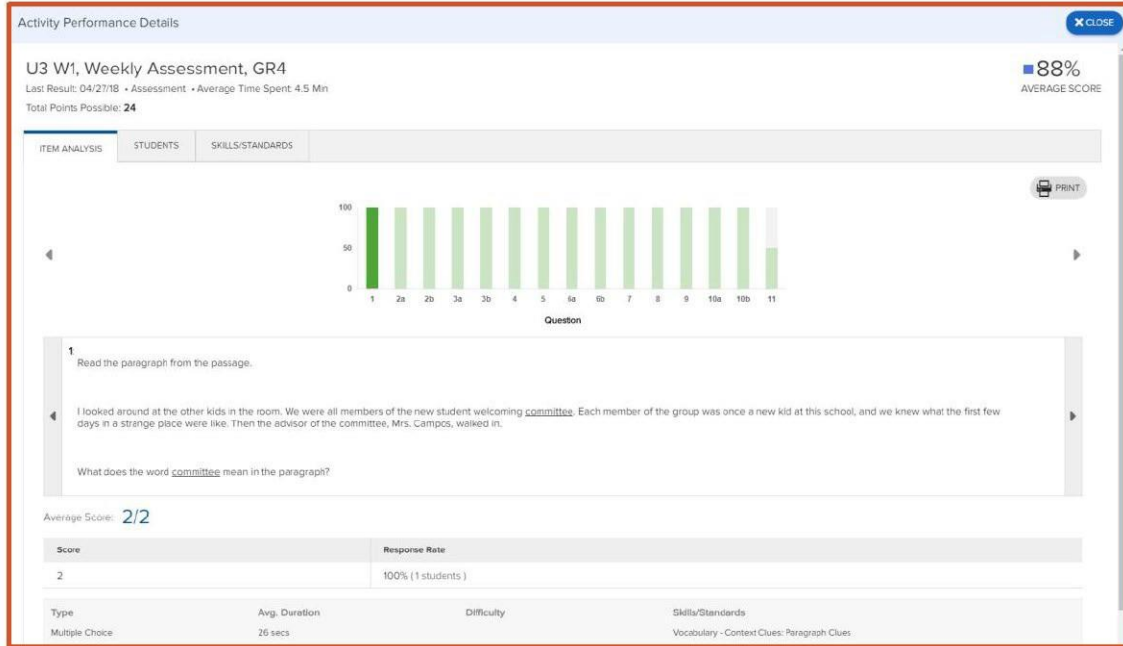

Recommendations Report

Helps measure students' mastery of skills and standards, access resources aligned to learning needs, and plan differentiated support.

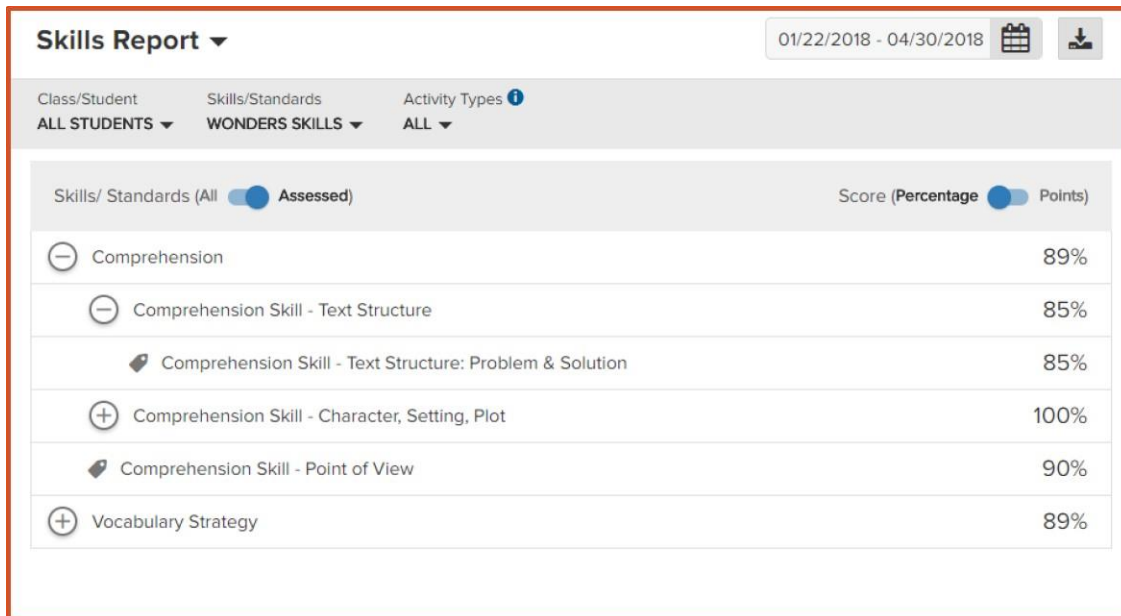

Activity Report

Provides detailed information about each activity that produces data, including online assessments, games, and rubric scores.

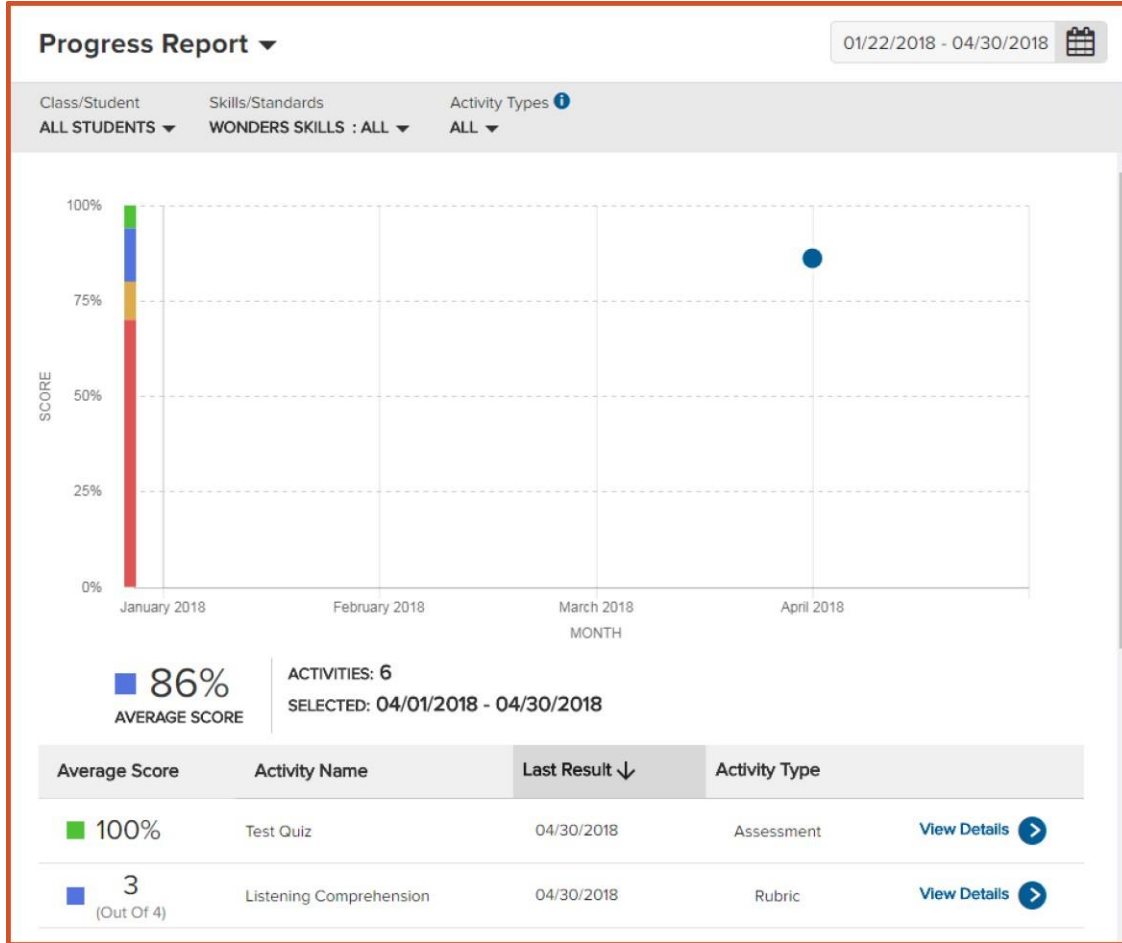

Skills Report

Looks at the skills and standards assessed online and monitors class and student progress toward achieving learning goals.

Progress Report

Charts overall student progress by tracking scores for each assessed skill and standard in graph form.

Grade Card Report

Tracks student total scores for each grading period, by listing each assessed skill and standard that makes up the grade, including highest and lowest performance.
