

# How to turn off Pop-up Blocker in Safari

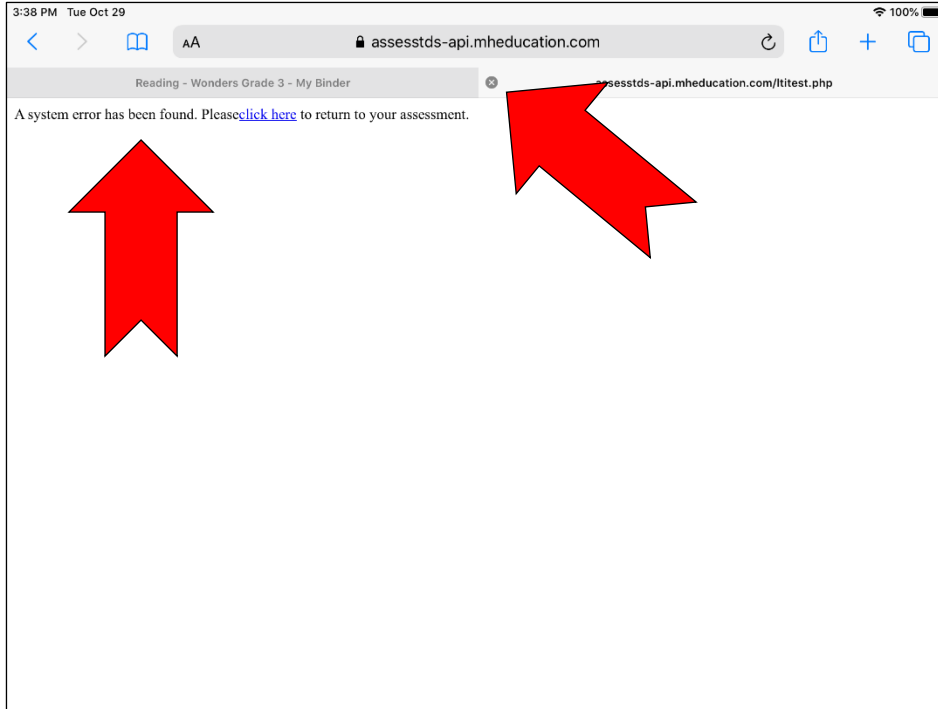

With the **Pop-up Blocker** on student receive a dialogue box asking if they want to allow a site to use pop-ups. If students select **Allow** there is no issue. If they do not allow then they have to turn off blocker in Safari.

On student iPad go to **Settings**.  Select **Safari** and under the **General** category move the **Block Pop-ups** slider from Green (on) to White (off).

For **ConnectEd** assessments, the 1<sup>st</sup> time launching the assessment after turning off **Pop-up blocker** you will receive an error. Close the tab, reload **Wonders** and the assessment will load correctly the 2<sup>nd</sup> time.

Once the **Pop-up Blocker** has been turned off and student has refreshed or logged back in they should have no problems launching and accessing the assessments in **ConnectEd** (Wonders/My Math).
