

How to turn off Pop-up Blocker in Chrome

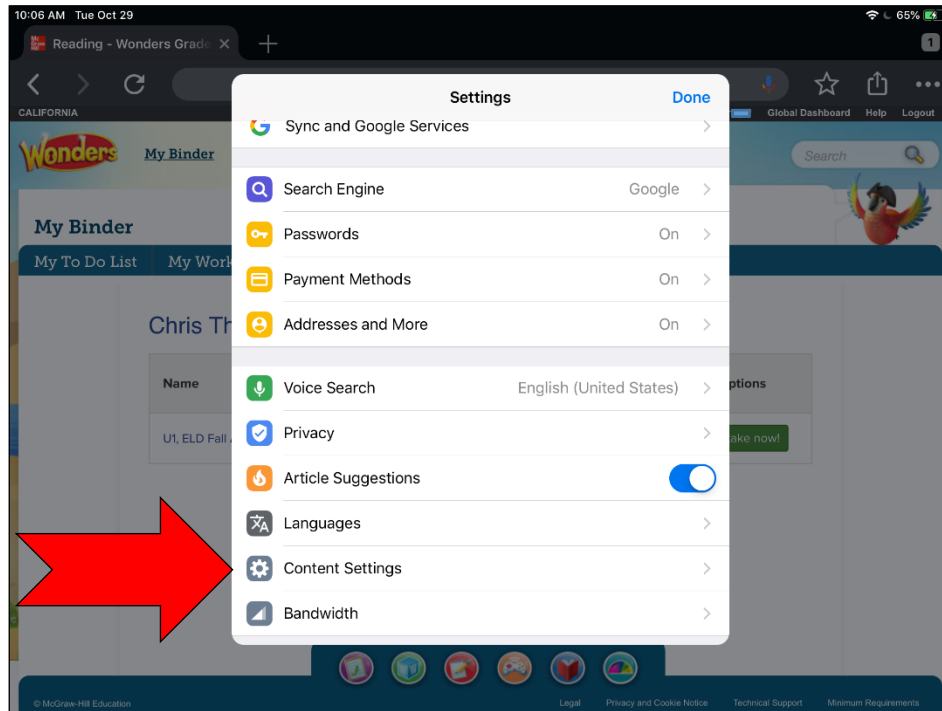

With the Pop-up Blocker on students receive a dialogue box asking if they want to allow a site to use pop-ups. If students select **Always show** there is no issue. If they do not allow then they have to turn off blocker in Chrome.

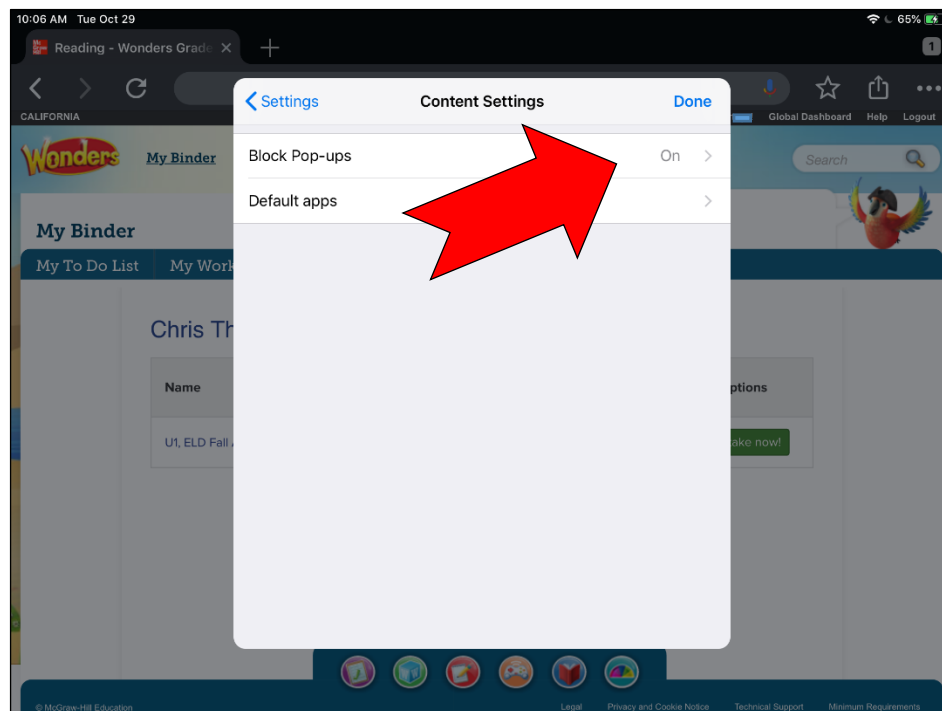

Go to settings by selecting the 3 dots on the right side of the browser and choose **Settings**.

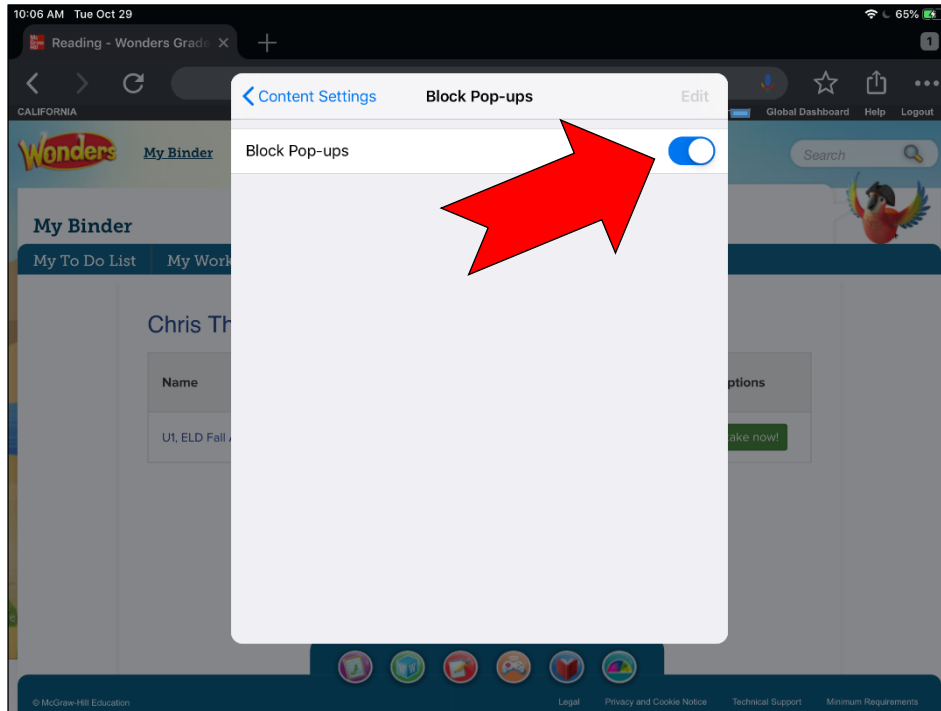

In the settings menu select **Content Settings**.

In Content Settings menu select **Block Pop-ups** which is on by default.

In Block Pop-ups menu switch **Block Pop-ups** slider switch to off. Blue is on and White is off.

For ConnectEd Assessments. The 1st time launching the assessment after turning off Pop-up blocker you will receive an error. Close the tab, reload Wonders and the assessment will load correctly the 2nd time.
